## Environmental Sustainability

### WHAT WE ARE DOING

- **ACCIDENTAL DISCHARGE PREVENTION**  
Preventing of accidental release of hazardous pollutants into environmental mediums.
- **LANDFILL IMPACT REDUCTION**  
Seeking alternative recycling and removal opportunities for waste streams.
- **INNOVATIVE PRODUCT SOLUTIONS**  
Researching and developing innovative product solutions for an ever changing market focused on circular economy.
- **INTERNAL RECYCLE UTILIZATION**  
While we currently do not utilize post-consumer recycle, we do utilize our internally generated recycle to reduce our waste impact.
- **INDUSTRY COLLABORATION**  
With our membership with the Sustainable Packaging Coalition, we collaborate with multiple industries to identify sustainable packaging solutions.

### Our Commitment to the Environment and Sustainability

The conservation objective of Bonset America Corporation is to be good environmental stewards to protect the environment and local community. We are dedicated to compliance to the U.S. EPA Regulations, as well as State and Local regulations.

We vow to take all precautions necessary to prevent the accidental discharge of hazardous pollutants into any environmental medium (air, local storm water system, and local sanitary water discharge system). In addition to this, Bonset America Corporation seeks to continuously reduce landfill impact by seeking alternative recycling and removal opportunities for several of our waste streams.

Bonset America Corporation also strives towards continued product sustainability in its efforts to seek,

research and develop innovative product solutions for an ever-changing market focused on circular economy. We make concerted efforts to develop new films geared towards environmental sustainability. While we currently do not utilize post-consumer recycle, we do utilize our internally generated recycle to reduce our waste impact. Industry collaboration is an integral part to strive towards sustainability, which is why we became members of the Sustainable Packaging Coalition (SPC).

By striving towards more environmentally conscious efforts such as these, Bonset America Corporation follows the example and motto set forth by our parent company in being “manufacturing friendly to people, the earth and the future.”
